MANVI BHANDARI

Software Developer — Java (Spring, Hibernate) & JavaScript (React.js)
Bangalore | manvibhandari.contact@gmail.com | +91-7983636357
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Information Technology graduate and Software Developer with frontend development experience using React.js, JavaScript, and Tailwind CSS. Contributed to a coaching institute management platform by developing responsive interfaces and reusable components. Familiar with Java, Spring Boot, Hibernate, SQL, and database concepts, with an interest in building reliable and maintainable web applications. B.Tech in Information Technology with a CGPA of 6.6/10.

SKILLS

Languages: Java, JavaScript, SQL

Backend Frameworks: Spring Boot, Spring Security, Hibernate

Databases & ORM: MySQL, MongoDB, Oracle, JPA

API & Integration: REST APIs, WebSockets, Socket.IO, Ola Maps API, Cloudinary

Security: JWT Authentication, Role-Based Access Control (RBAC)

Frontend: HTML, CSS, React.js, Tailwind CSS

Tools & Practices: Git, GitHub, Maven, Postman, Docker, Docker Compose, CI/CD, Agile, MVC Architecture, AI-Assisted Development

PROFESSIONAL EXPERIENCE

Freelance — Frontend Developer **Mar 2026 – May 2026**

- Developed the complete web frontend using React.js and Tailwind CSS, delivering responsive and user-friendly interfaces across the platform.
- Built interactive dashboards and reusable UI components for student and faculty management, attendance, assessments, billing, payment management, and academic resources.
- Built responsive frontend interfaces and streamlined administrative workflows, reducing manual administrative workload by 55%.
- Integrated frontend components with backend APIs, ensuring seamless data flow and a consistent user experience.

PROJECTS

Uber Clone (Ride Booking Platform) GitHub | Live

- Developed backend REST APIs using Java, Spring Boot, and MongoDB for ride booking and management.
- Implemented Spring Security, JWT authentication, and role-based access control (RBAC) for riders and captains.
- Integrated WebSockets for real-time ride status updates and location tracking.
- Integrated Ola Maps APIs for geocoding, route calculation, and distance-based fare estimation.
- Containerized application services using Docker and Docker Compose.
- **Tech Stack:** Java, Spring Boot, Spring Security, REST APIs, JWT, MongoDB, WebSockets, Docker, Ola Maps API.

Trip Planner Web Application GitHub

- Developed backend services using Java and Spring Boot for a trip management application.
- Designed and implemented RESTful APIs to handle trip planning, user management, and application operations.
- Implemented JWT authentication and role-based access control for Admin, Planner, and User roles.
- Integrated MySQL database operations using JPA/Hibernate to manage application data and relationships.
- Tested and validated backend REST APIs using Postman to verify request handling and application functionality.

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology **Nov 2022 – May 2026**
Hemvati Nandan Bahuguna Garhwal University CGPA: 6.6 / 10
